

# **PACEMAKER**

## **PACEMAKER** HEADERS Product Information Supplement

To Suit

All Commodore VN VP VR Models

**PACEMAKER** HEADERS Part No **PH5029**

The fitment of **PACEMAKER** HEADERS Part No **PH5029** to all Commodore **VN VP VR** vehicles will require the removal of the beaming brace in the earlier VN model vehicles, or a modification of the existing beaming brace in the remaining Commodores. This includes auto as well as manual gearbox applications.

Most automatic gearbox beaming braces have the torque converter dust cover cast in them so it is not recommended to remove and discard this brace, however it should still be trimmed to suit the position of the headers.

Failure to address this modification will lead to a substandard fitment of this product and will result in voiding any future warranty claims.
